For California.

We shall issue on Monday next, in time for the steamer Crescent City, our next number of The Tribune for California, Oregon and the Sandwich Islands. It will contain the Trial of Prof. Webster, Congressional Proceedings, and all the News received up to the time of going to press.

Persons desiring copies of this paper must leave their orders at the desk to-day.

Hon. T. BUTLER KING's Official Report to the Secretary of State on the Agricultural and Mineral Resources, Natural Features and present Condition of California almost fills the Supple. ment which accompanies this day's Tribune. As we only received it at a late hour last night in yesterday's Republic, we have no room or leisure for comments, but we believe its view of California is a very full and fair one-rose-colored, perhaps, but in the main sound and just. Some of Mr. King's estimates are of course mere guesses, which may come very wide of the results. We have to make on this text. question, especially his estimate that an ounce of badly provided labor hitherto expended in goldwashing in California. Our first impression of his plan of issuing Government Permits to gold-seek- saed there by the present Administration. Francisco we have never had a doubt. Some of on betraying to Great Britain the honor and interthe facts stated in his Report will not be new to our readers. The latter half will be found by far the most interesting.

"," Subscribers who fall to receive the Supple this morning's paper may confidently expect it with our above quotations. It next. We are obliged to go to press with our regular form practice by profession. first and the Supplement afterward—perhaps too late to serve it to all our patrons this morning.

Congress.

The Senate was not in Session yesterday. In the House of Representatives a good deal time was spent on the stereotyped Decatur claim, which was finally laid upon the table, would we might hope there to rest forever. The Committee on the Charge made by PRESTON KING ter from blame in the matter.

Connecticut.
On Monday the People of Connecticut are called to choose State Officers and a Legislature for the ensuing year, and the Legislature so chosen wil be required to elect a United States Senator for six years from the close of the present Congress The Election is therefore one of decided importance, since it will not only embody and express the views and feelings of Connecticut with regard to our National Policy, but it will exert a strong in fluence, prospectively, in shaping that policy, through the choice of a U. S. Senator. The opinions and convictions of the People of

are adverse to Conquest and Aggression, in favor of beneficent policy with regard to River and Harbor Slavery, decidedly hostile to any Extension of Hu. American Consul at that port. ndage over Soil now Free. These are the views cherished and represented by the Whig can. didates; while their antagonists, though not open and manly in their declarations, practically incline to the opposite policy. A victory to Loco-Focoism in Connecticut would be a triumph to the dominant liticians of Virginia, South Carolina and Texas ally the Land of Steady Habits with Massachusetts New-York and Kentucky. It would be a victor of that policy which, if carried out to its legitimate and logical conclusions, would depopulate the villages of Connectisut, exile her artisans and laborers and destroy the value of her farms by depriving her farmers of their ready and remunerating mar kets. It would be a victory of Unreason-a festival

There is no danger that the Freemen of Connectiont will so vote, though Isporance, inveterate Prejudice and Alcohol will give the wrong party stowed. But all those cannot suffice public duty.

If yes, we have no more to offer. JONATHAN HUNT.-The mystery in relation to eappearance of this individual has not been cleared up-entleman who is interested in the matter, and who to Liverpool a short time since, has made some inwent to Liverpool a short time since, has made some inquiries, but no further developments have resulted. The
gentleman reported to have seen Mr. Hunt in Liverpool,
Mr. Scoti of Manchestee, reiterates his statement, that he
did have half an hour's conversation with Mr. Hunt in Liverpool, who told him he had been traveling on the Continent. Nothing has been seen or heard of Hunt since, and
the inference from all the circumstances of the case is, that
Mr. Scoti was mistaken in the person. Mr. Hunt disappeared about two years since, at Charleston, and was
known to have but a small amount of money with him.

James K. Polk was the last "Democratic" President of the United States, and James Buchanan ington and immediately thereafter addressed a note was his Secretary of State. Theirs was a regular, to Mr. Buchanan, Secretary of State, in which he flat-footed, "Democratic," 540 40' Administration, called to his notice the reaffirmance of the Monroe at least so far as loud and zealous profession could make it so.

The policy of this Administration in reference to pression of the desire of Nicaragua, that the Gov other States and Territories in North America, is ernment of the United States would promptly described in the most decided terms in Mr. Polk's take measures to resist the aggressions of Great first annual message. The following are extracts Britain in Central America, before it was too late from that document :

This is all plain enough. Here is the policy of this " Democratic" Administration announced to the world. Mr. Monroe's doctrine is to be main tained by it against all comers. It may be interesting to see what commentary certain facts of history

Taylor and his Cabinet were bent ests of the Republic. On this head we say noth ing for the present, but simply propose to shot how the late "Democratic" Administration cared for those interests and that honor; and as a stand ard by which to judge we have introduced the above quotations. It is always fair to measure

Those who recollect how pitifully, though discreet ly, the last Administration backed out after their bluster on the Oregon affair, will not expect that such a trial will yield very pleasing results in the present case, but they will hardly be prepared for the peculiar revelations we are about to lay before

The facts we narrate below are drawn from the official documents which are on file in the Nicura against the Speaker, reported exonerating the latwe are indebted to a gentleman interested in tha country, who has kindly communicated their substance for our columns. The statement is as
